

BIO T

by **BIOEX**

Ecological training foam concentrate

- ▶ Fluorine free
- ▶ Glycol free
- ▶ Usable at 1%, 3% and 6%
- ▶ For exercises on hydrocarbon and polar solvent fires

BIO T

Ecological training foam concentrate

- ▶ Fluorine free
- ▶ Glycol free

- ▶ Usable at 1%, 3% and 6%
- ▶ For exercises on hydrocarbon and polar solvent fires

USE

The BIOex research and development team has designed a **true ecological and economical alternative for quality training**.

BIO T training foam concentrates generate a light foam allowing the fast re-ignition of the fuel layer used for training purposes.

This has the advantage of giving fire fighting teams the opportunity of training using a single training system. The rotation of teams training on this system also makes it possible for trainees to see how to apply additives and then handle them, thus giving a certain objectivity to handling fire-fighting foam concentrates in live conditions.

The extinguishing properties of the BIO T foam base have been deliberately reduced. Thus teams can train to improve their fire extinguishing techniques by perfecting how they apply them.

Once the training session is over, the BIO T foam is easy to clean due to its rapid settling.

EXTINGUISHING PERFORMANCES

USE:

- Usable at Low, Medium and High Expansion.
- Applicable on hydrocarbon fires such as fuel, diesel oil, petrol, kerosene, etc.
- Used for all types of manoeuvres.
- Compatible with all equipment on the market, under identical conditions to a classic operational foam concentrate.

FEATURE:

Usable at 1%, 3% and 6%. A 6% special version has been designed for exercises on polar solvent fires.

WARRANTY:

- 2 years.

THEY HAVE CHOSEN BIO T:

Many training centers, Firefighting schools and Fire Brigades are confident using it.

ENVIRONMENT

BIO T line products are totally free of fluorine derivatives and are manufactured without glycol.

They are **easy to eliminate because these foam concentrates are biodegradable**. They deteriorate quickly without any PBT residues

(Persistent Bioaccumulative Toxin). Depending on the capacity of your sewage treatment station and your waste contract, BIO T training foam concentrates can be eliminated **without using incineration**.
