

LUKAS

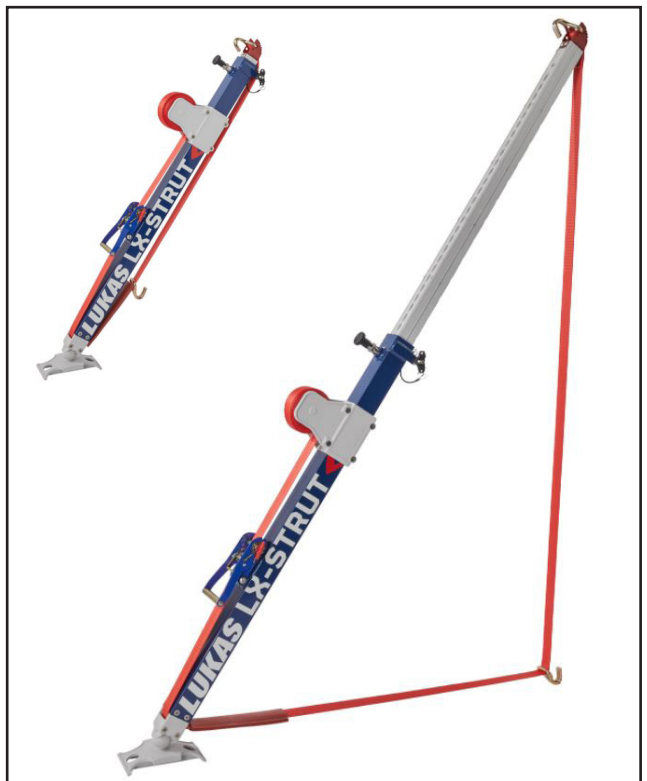

LX STRUT

Introducing the new LX Strut from Lukas, a state of the art Stabilising Strut for Road Crash Rescue. Like the market leading range of Lukas Road Crash Rescue Tools (hydraulic, eDraulic and EWXT), the LX Strut is engineered and designed with efficiency, durability and usability in mind.

The Lukas LX Strut is manufactured from semi-crystalline polyamide reinforced with fibre glass giving it optimal strength whilst keeping weight to a minimum - each strut weighs just 5.1kg! The LX Strut incorporates self retracting webbing, flexible fixing position and a newly developed red stainless steel head that provides unparalleled grip during application.

LX Strut Specifications

Retracted Length	1070 mm
Extended Length	1850 mm
Weight (per strut)	5.1 kg
Strap Length	4m
