

Protective equipment

Protection covers

Protecting the rescuers.

This is how to effectively protect your rescue team from injuries on sharp edges with little effort. The protective bags are put on the cut-off ends of the vehicle columns and are securely fixed with Velcro tape. The protective sheets are used everywhere on the bodywork to cover up sharp edges, e.g. on fender or in the roof area, and are fixed via sewn-in magnets.

With one set, one side of a vehicle and, if necessary, a dangerous roof edge can be covered over. To completely cover both sides, a second set of protective sheeting is required.

Staying organized

A multifunctional sheet made of tear-proof, waterproof and dirt-repellent material. Among other uses, during a rescue they are used as a central place to keep tools, providing a clear overview and increasing safety.
